

Raised Bed Growing System

Everything the ever increasing number of 'Grow Your Own' consumers need to grow vegetables, salads and herbs without an allotment. Easy to build and requiring little maintenance, the system incorporates a heavy and attractive 20mm FSC certified and pressure treated timber base, joining brackets, and extension brackets to build multiple tier beds. Powder coated Raised Bed Frames are purchased separately, along with Polythene Weather Protection Covers, and Micromesh Pest Protection Covers.

Raised Bed Base

- FSC certified and treated heavy duty 20mm timber
- Timber sides retain warmth
- Easy to build and maintain
- Tough plastic corner joints
- Includes 4 corner extension joints for multi-tiered beds

Raised Bed Frame

- Fits Haxnicks timber raised bed
- Easy assembly powder coated steel frame
- Sturdy and rust resistant
- For Polythene and Micromesh covers

Raised Bed Weather Protection Cover

- Warms soil for earlier planting
- Retains warmth and humidity for quicker growth
- Protects against harsh weather
- Safeguards crops from animals and pests

Raised Bed Micromesh™ Pest Protection Cover

- Ultra-fine mesh protects crops from aphids, carrot fly, birds and animals
- Allows air and rain to pass through easily
- Prevents scorching from hot sun
- Helps retain soil moisture

Grow It!
 "The price of this raised bed would be difficult to beat even if you were to buy the timber yourself"
 April 2011
