

Grower System

A unique new growing system that offers a practical solution for raising and protecting large numbers of taller plants. Ideal as a temporary spring greenhouse and shelter for pots and trays, or as a growing and protection cover for larger brassicas and fruit bushes. The Grower serves as a perfect over wintering station for tender patio plants, and for protecting nursery beds.

Grower Frame

- Ideal growing shelter for pots, trays, nursery beds, fruit bushes and tall plants
- Easy assembly powder coated steel frame with ground pegs
- Sturdy and rust resistant
- For Haxnicks Grower Covers

Grower Weather Protection Cover

- Heavy duty weather and pest protection
- Retains warmth and humidity for quicker growth
- 4 side zips provide easy access
- Complete with insect proof ventilation panels

Grower Micromesh Pest Protection Cover

- Ultra-fine micromesh safeguards plants from aphids, carrot fly and other pests
- Allows air and rain water to pass through easily
- Protects from harsh weather and scorching sun
- 4 side zips provide easy access
