

Plant Protection Fabrics

Aero-Poly™ Sheet

Early Fruit and Vegetables

- Lightweight polythene fabric warms soil for early direct sowings.
- Protects seedlings from harsh weather, ripens fruit and protects newly sown lawns
- Retains warmth and moisture
- Aeration holes prevent overheating, encourage pollinating insects, and allow water to pass through easily

Extra Thick Fleece Blanket

Winter Frost Protection

- Forms a barrier against weather, birds, animals and insects
- Extra thick 35gsm fabric creates and retains warmth, protects against frosts and allows air and moisture to filter through
- Soft green tint provides shading, prevents scorching

Micromesh™

Ultimate Insect Barrier

- Forms a barrier against insects, birds, animals and frosts
- Ultra-fine 0.6mm mesh protects from insects including carrot-fly, flea-beetle, aphids, and allows air and water to pass through easily
- Green tint provides shading and retains moisture

Fabric Pegs

U-Shaped Pegs

- Made from galvanised steel
- Many other garden uses
- Available with 'clip-strips'
